

CIMCOOL®

SOLUTIONS LEAD TO SAVINGS

Experience and knowledge within a world-wide group

Cimcool is a leading world-wide specialist in the supply of metalworking fluids. Our success is built, not just upon the continuous innovation and improvement of our products, but also upon the continuing development of our personnel. This is achieved through close communication and co-operation with customers and suppliers. Environmental issues, health & safety aspects and the drive to reduce total costs are key elements in the development of our products. This combination of elements makes us unique. Flexibility is another key factor in enabling us to meet the needs of our customers by reacting quickly to the ever-changing demands of our market.

Cimcool offers a comprehensive range of products for each and every metal process, including metal removal or grinding, forming and cleaning.

Moreover, Cimcool develops products for specific industries. One of these is the aerospace industry, for which Cimcool fluids have proven to create substantial productivity improvements in demanding operations on high-tech materials such as nickel-based alloys and titanium. Cimcool has several Aerospace Approvals of well known manufactures in the aerospace industry.

Our customers can count on fluids with a long life, low consumption and, when applied correctly, lower tool costs. All in all, Cimcool products are very economical and reduce the total annual process costs.

Product range

Internationally respected brands stocked include:

CIMCLEAN®

Industrial cleaners and parts washers

CIMSTAR®

Water soluble semi-synthetic cutting and grinding fluids

CIMFREE®

Metalworking fluids based on renewable raw materials

CIMTECH®

Water soluble synthetic cutting and grinding fluids

CIMPERIAL®

Emulsion cutting and grinding fluids

MILFORM®

Metalforming products

CIMGUARD®

Protection against corrosion

MILPRO®

Neat cutting and grinding oils
